

NOSTRIL RETAINERS

4-Stage Retainer Set

The Alpha Health Post Surgical 4-Stage Retainer Set is a range of Surgical Nostril Retainers used in Cleft Lip and Palate repair to aid patients in their recovery after surgery.

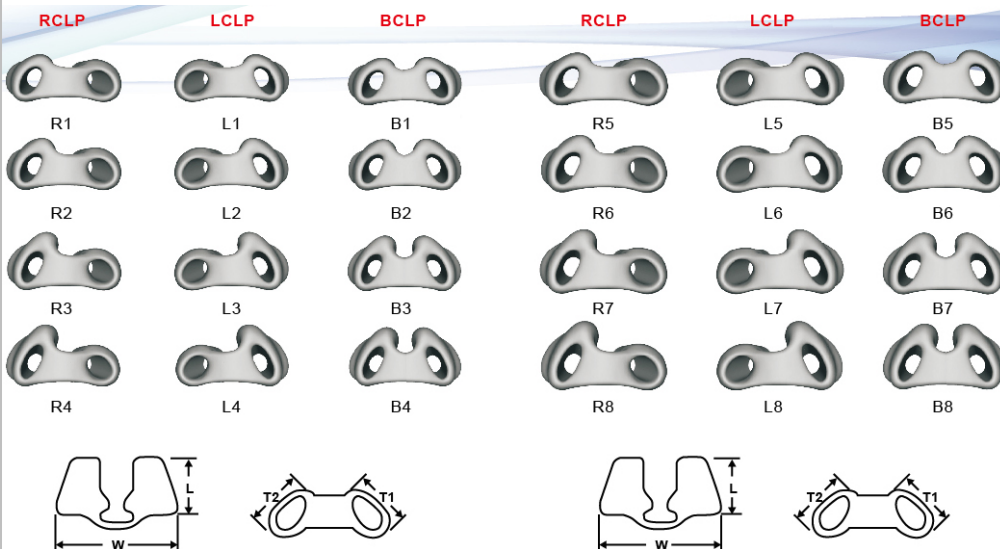

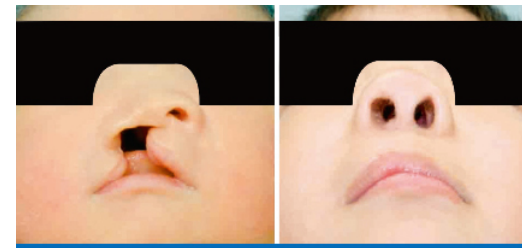

The patented design helps to gradually elevate and correct malformations over 4-stages.

These retainers have clinically shown to prevent post-operative complication of nostril distortion and help patient's optimize an aesthetic results.

With its unique design and Silicone construction, the product is comfortable to wear and easy to clean.

The range is available in 3 different shapes (RCLP, LCLP, and BCLP) and 26 different sizes to fit the needs of any patient.

规格 (S)	编号	W	L	T1	T2
